VACUUM SKIN PACKAGING

Patented PET Tray

Vacuum Skin Packaging (VSP) trays are used to extend the shelf life of products by increasing the protection of food from oxygen and water. The Clearly Clean solution offers a smooth, rolled edge VSP tray that is not only recyclable, but is also significantly more durable than the standard VSP tray.

CLARITY

Clearly Clean's recyclable trays are available in multiple colors, including crystal clear. The latter allows you to make your product the STAR of the package.

EFFICIENCY

Clearly Clean PET trays can immediately replace all Styrofoam trays on high-speed packaging machinery — no need for an equipment change.

STRENGTH

Clearly Clean PET trays are **THREE TIMES STRONGER** than Styrofoam and will not break during production or transportation.
