

Clearly Clean Purchases 80,000 Sq. Ft. Facility in Frackville, Pa.

New distribution center represents Clearly Clean's second major expansion in a year

ORWIGSBURG, Pa., Nov. 4, 2020 -- Clearly Clean Products, LLC, the recyclable, smooth-edge food tray manufacturer, today officially announced the purchase of an 80,000 sq. ft. distribution center in Frackville, Pa. The new facility is located directly across the street from its Frackville manufacturing plant, which officially opened in October 2019.

Clearly Clean recently hired 35 people and is currently hiring another 15 employees for both its Frackville and Orwigsburg, Pennsylvania, plants due to increased demand for its products.

Clearly Clean produces PATENTED 100% recyclable, smooth-edged Roll Over-Wrap® trays, vacuum-sealed packaging (VSP) trays, and recyclable modified atmosphere packaging (MAP) trays. Consumer pressure – combined with numerous citywide and countywide bans on polystyrene ("Styrofoam"-type foamed plastics) and corporate commitment -- are fueling the demand for eco-friendly packaging and accelerating the sustainability timelines of many organizations.

"The new distribution center will help support the 3,000% growth we've experienced since we patented our Roll Over-Wrap Tray® in 2016," said Millard Wallace, a managing partner at Clearly Clean. "We're blessed to have this new addition as a reassurance to our clients that we are prepared to be a valuable long-term partner to meet their needs."

Clearly Clean's award-winning recyclable food trays can be utilized for meat, poultry, seafood, produce, and deli and are available in multiple sizes and color options. Its trays utilize PET, the same material used in recyclable water bottles, offering a recyclable, smooth-edged tray option to grocery stores, food processors, and packaging distributors.

"The purchase of this Frackville facility allowed us to further expand our footprint," said Jeff Maguire, a managing partner at Clearly Clean. "We are thankful to be able to bring job opportunities to the community and families in Schuylkill County and beyond."
