

The clear choice for a clean environment

San Diego Expected to Ban Foam Food Trays April 1, 2023

What are your options?

San Diego deems recyclable plastic "preferred"; while molded fiber, compostable, and biodegradable are deemed "not preferred."

100% Recyclable Food Trays

Clearly Clean manufactures the WORLD'S ONLY PATENTED 100% RECYCLABLE, ROLLED-EDGE PET overwrap trays. This FDA-compliant tray features a proprietary

rolled edge for overwrap and vacuum skin packaging (VSP) films.

Clearly Clean's Roll Over-Wrap™ Trays, produced in both a processor grade and a supermarket grade, can be utilized for fresh meat, poultry, seafood, and produce – and customized in terms of size, thickness, shape, and color. They are available with or without pads.

The clear choice for a clean environment

Benefits

Reduce product loss and increase customer satisfaction:

- Mitigate leakers during production and transportation
- Three times stronger than foam
- Will not bow tie due to weak walls
- Withstands high-speed processors without a loss in structural strength

Make a quick and easy change from polystyrene or polypropylene (PP):

- No need to change equipment

Make the product the center of attention:

- Available in multiple colors, including crystal clear

Maximum shelf appeal:

- Make your product stand out from the competition. Words used to describe the tray's look include "clean," "fresh," and "different." Customers notice a difference – and so will future generations.

100% Recyclable Food Trays

The Clearly Clean Roll Over-Wrap™ Tray is the world's only **PATENTED** 100% recyclable, smooth-edge overwrap tray for food products. Clearly Clean's trays are marked with the #1 resin code, which signifies the most recyclable plastic.
